

Maven Off Air EMEA-APAC

Exo High Power Cellular Repeater

Datasheet version 1.2

System Features

- Fully digital repeater
- Fanless IP65 rated unit
- Highly efficient, reducing cost and emissions
- Dual-band units
- 5G-ready platform
- Excellent PIM and noise performance
- System auto-commissioning
- MIMO support

Maven Exo is a highly capable all-digital cellular repeater platform supporting multi-operator, multi-band installations for all EMEA bands. The Exo platform embeds up to two cellular bands in the same fanless enclosure.

Installation of the Maven Off Air is quick thanks to few components, and also since the units are a one man lift. The system has auto-commissioning functionality which brings the system up and running quickly. Problem-free

operation is assured with diagnostics such as spectrum analysis and automatic isolation margin measurement.

The secure web interface is intuitive and easy to use, making it useful for any level of technician. The equipment can be accessed from a laptop or a tablet, or via a cellular modem. The standardised supervision interface can be connected to any standard NMS using SNMP v2c or v3. The units provide a dry-contact relay output for alarm status.
