MOBILE CONTRIBUTION ENCODER

**ViBE CP6100** | HALF-RACK CONTRIBUTION PLATFORM

The ViBE CP6100 modular and high-density platform is ideally designed for space-constrained applications. It offers up to two HD channels plus DVB-S2X satellite modulation in a half-rack unit.

H.264 4:2:2 10-bit encoding, second video channel capability and 32APSK modulation are also available as software options.
